Lead AI and ML engineer and data scientist with **10+ years** of experience, building production AI/ML/LLM systems. Leads end-to-end AI delivery, combining hands-on model development with technical leadership to turn business problems into scalable, high-throughput, low-latency production systems. Experience spans predictive modelling, forecasting, operations research, computer vision, and generative AI across retail, cybersecurity, manufacturing, insurance, and supply-chain optimization.

WORK EXPERIENCE

- Lead Artificial Intelligence Engineer

Best Buy | Jul 2025 – Present

- Productionized a reusable **LLM fine-tuning framework** using Unsloth, PEFT / Hugging Face Transformers, Accelerate and LoRA / QLoRA for distributed training, task-specific adapters and automated evaluation.
 - Deployed **Docker-based vLLM inference on GKE** to support multiple AI tasks through OpenAI-compatible endpoints, with HPA autoscaling, Istio routing and Prometheus/Grafana monitoring, with **estimated annual API-cost savings of ~\$300K**. Kept inputs company-managed, reducing dependence on external API availability and behavior during peak demand.
 - Built **batch, streaming and real-time fraud systems** with a feature pipeline handling **40,000 events/sec at peak**, using Apache Beam (Python / Java SDKs), GCP Dataflow, Pub/Sub and Vertex AI Feature Store.
 - Supported a **200 ms scoring SLA** and improved holiday fraud-score coverage by **~20%**; deployed XGBoost through Helm and Seldon Core with JWT-secured endpoints.
 - Led retail ML/LLM architecture and delivery with data scientists, automating GitOps through Cloud Build, ArgoCD and Google KCC and managing artifacts in Artifact Registry.
- Lead ML Engineer — ML Engineering & Operations

Wipro | Aug 2023 – Jul 2025

- Engineered **AWS account digital fingerprinting** on NVIDIA DGX with RAPIDS cuDF / CuPy. Trained per-entity behavioral autoencoders on **billion-row security datasets**, with continuous retraining, MLflow model management and Grafana anomaly alerts.
 - Scaled **Proofpoint phishing detection to 2,400 emails/sec (2x throughput)** through GPU-accelerated preprocessing, feature engineering and inference. Integrated analyst feedback and Microsoft Sentinel to detect missed phishing and support quarantine.
 - Automated **abuse-inbox triage, doubling case volume** and reducing manual review. Used ML routing and OCR (pytesseract, cuDF) across email bodies and attachments; routed scammer identifiers to security teams and partners for takedowns.
 - Mentored ML/MLOps engineers, coordinated client/NVIDIA delivery, screened **300+ resumes** and conducted **50+ technical interviews**. Earned Best Buy client AML Hall of Fame recognition (2024).

Senior Data Scientist — Data Science / Azure ML

Accenture | May 2021 – Sep 2023

- Developed **product-quality prediction for BamaGruppen** with fully automated training and serving using Logic Apps and Azure ML platform services, including Azure ML pipelines, model registry and container deployments.
- Increased truck inspections from **130 to 160/day**, defect detection by **17%** and customer approval by **20%**, delivering **\$2.5M annual savings**.
- Replaced manual Excel planning with automated last-mile routing and transport optimization using OR-Tools and mixed-integer models, integrating Azure Functions, Logic Apps and RPA to enable rapid replanning and improve delivery efficiency.
- Modelled **supply-chain and distribution-hub scenarios** across cost, freshness, carbon and warehouse volumes using OR-Tools on Azure ML with Power BI reporting.
- Led cross-functional delivery, mentored data scientists and presented network-design recommendations to Norwegian stakeholders.

Data Scientist

GD Research Centre Pvt Ltd | May 2020 – May 2021

- Developed **forecasts and scenario analysis for GlobalData** across **15+ industry verticals** with forecasting and feature-engineering pipelines, informing market intelligence and resource allocation.

Deep Learning Engineer

Tata Consultancy Services | Jul 2019 – Mar 2020

- Developed **semiconductor defect detection** with TensorFlow / Keras DenseNet on a GCP multi-GPU cluster. Distributed training on **~1 million images in ~3 hours** achieved **90% classification accuracy**.
- Ingested SQL Server data and served inference with Docker / TensorFlow Serving. Deployed the end-to-end system at Amkor, South Korea, and trained the client team.

Senior Software Engineer — ML

Infosys | May 2016 – Jul 2019

- Implemented **opportunity win/lose prediction** with logistic-regression scoring and data pipelines for sales prioritization; integrated SQL Server Integration Services, SSAS and Power BI dashboards.
- Delivered tested **insurance ID-card workflows** using COBOL, JCL, DB2, VSAM and CICS; handled impact analysis, design and support, and shared knowledge with the team.
